Launch of International Furniture Centre

Singapore launches its first one-stop, year-round platform for international export business where global furniture players converge to view, source and trade on a wide variety of quality, well-designed products from Singapore and the region. More to this, the International Furniture Centre (IFC) located at Sungei Kadut Loop also serves as a centre for learning in furniture manufacturing, design, marketing, sales, logistics and management through its Furniture Learning Institute. More than half of the space in this five-storey built area of 9,290 sqm is dedicated to showrooms.
