### **A Life Less Ordinary**

Images: Urban Foundry

Urban Foundry presented its latest products at this year's Imm Cologne. Starting from a small initial collection in 2003, the Singapore based company has grown to a range of armchairs, sofas, storage solutions, chairs and even coffee tables in their collection today. They stay true to their basic principle that life is a journey and it is more than just being ordinary.

New products exhibited include Traversa, a dining table that explores the intersection of lines and spaces to form a unique base. Plate and an updated version of Scoop are also some of the new items included.
