jarrod lim won the furniture design award / FDA merit award 2009,
category young designers, with his 'century table'.

detail of century table

CENTURY TABLE

Looking like a cross between a modernised Ming Dynasty antique and a lunar vehicle, the Century table is a clash of cultures that has produced a design of absolute simplicity. The design has been purposefully refined to its most basic elements to create a product that is unassuming yet beautiful, functional and totally necessary. A simple problem in everyday life inspired the design. As most people have encountered at some point, there is often no place to put a bag or umbrella when sitting down at a cafe table. The Century table offers a practical and elegant solution in a form that blends past and present. Hence the name Century..... The question is 'Which Century?'

The Century Table is developed around the idea of a standard steel table leg. The angled brace provides a simple hook to hang bags or umbrellas. It also helps to increase the stability and strength of the table.

how to use the century table
